

# IEA Bioenergy

EBC welcomes the IEA Bioenergy Task 33: Gasification of Biomass and Waste at KIT Campus North from June 5 – 7, 2019. The meeting includes the Task Meeting, an international workshop on "Gas cleaning, experiences, new developments, analytics and diagnostics" as well as excursions to the bioliq® plant of KIT and to the gasification plants of BASF SE in Ludwigshafen. 30 scientists from 7 countries discuss the status and new tasks of gasification technology. The potentials of the gasification technology to close the carbon cycle is the focus of the exchange.
