

State Minister of the Environment Untersteller visits KIT

(Photos: Magali Hauser)

Two topics were on the agenda of the visit of Franz Untersteller, Minister for the Environment, Climate and Energy Baden-Wuerttemberg on August 6, 2020 as part of his summer tour: the work of the THINKTANK Industrial Resource Strategies, which is located at the KIT, and information about the Energy Lab 2.0.

A resource-efficient and climate-neutral circular economy for plastics is a focus of the THINKTANK. At the ITC's plastics pyrolysis plant, the visitors, who were accompanied throughout the afternoon by KIT Vice President for Innovation and International Affairs Prof. Thomas Hirth, got informed about the chemical recycling of plastic waste.
